

3. Basic usage tutorial

Make DOFBOT and your computer on the same LAN

1. If our DOFBOT is connected to the same LAN as the PC network via WIFI, we can log in directly on the PC-side Google Chrome or other browser (DOFBOT IP address): 8888 to DOFBOT's Jupyter Lab,

for example: <http://192.168.1.244:8888>

192.168.1.244 is my DOFBOTIP address. You need to input your own IP address.

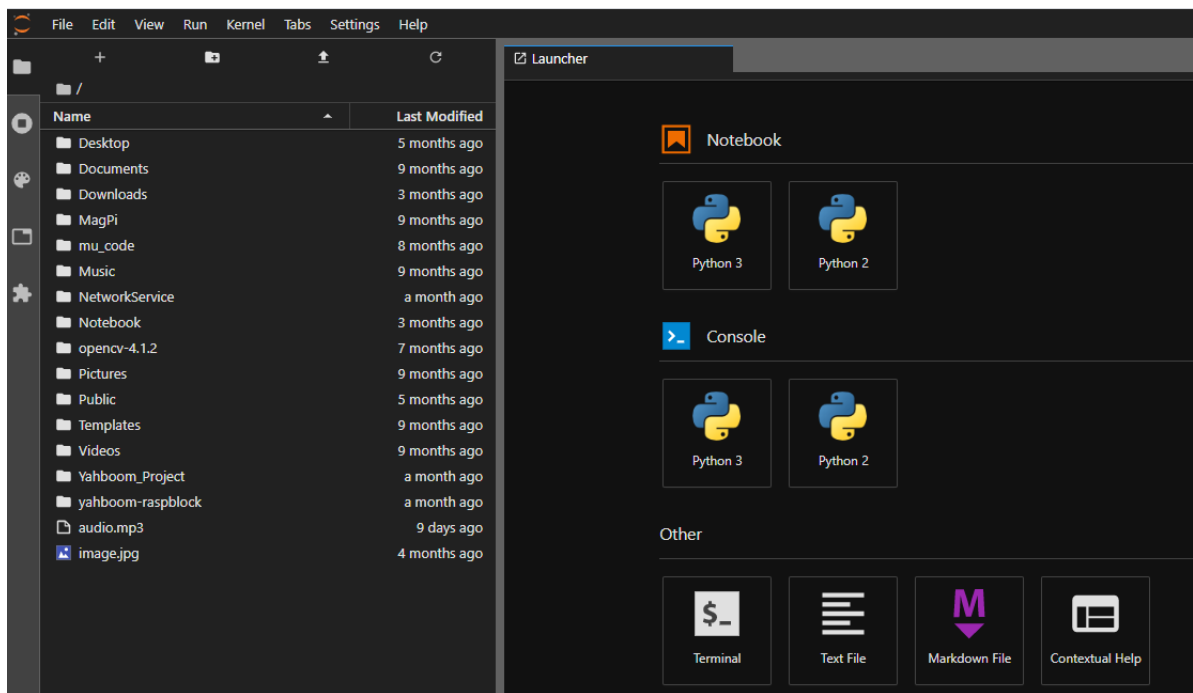

As shown below:

2. Input password. If you use image we provided, password is ***yahboom***.

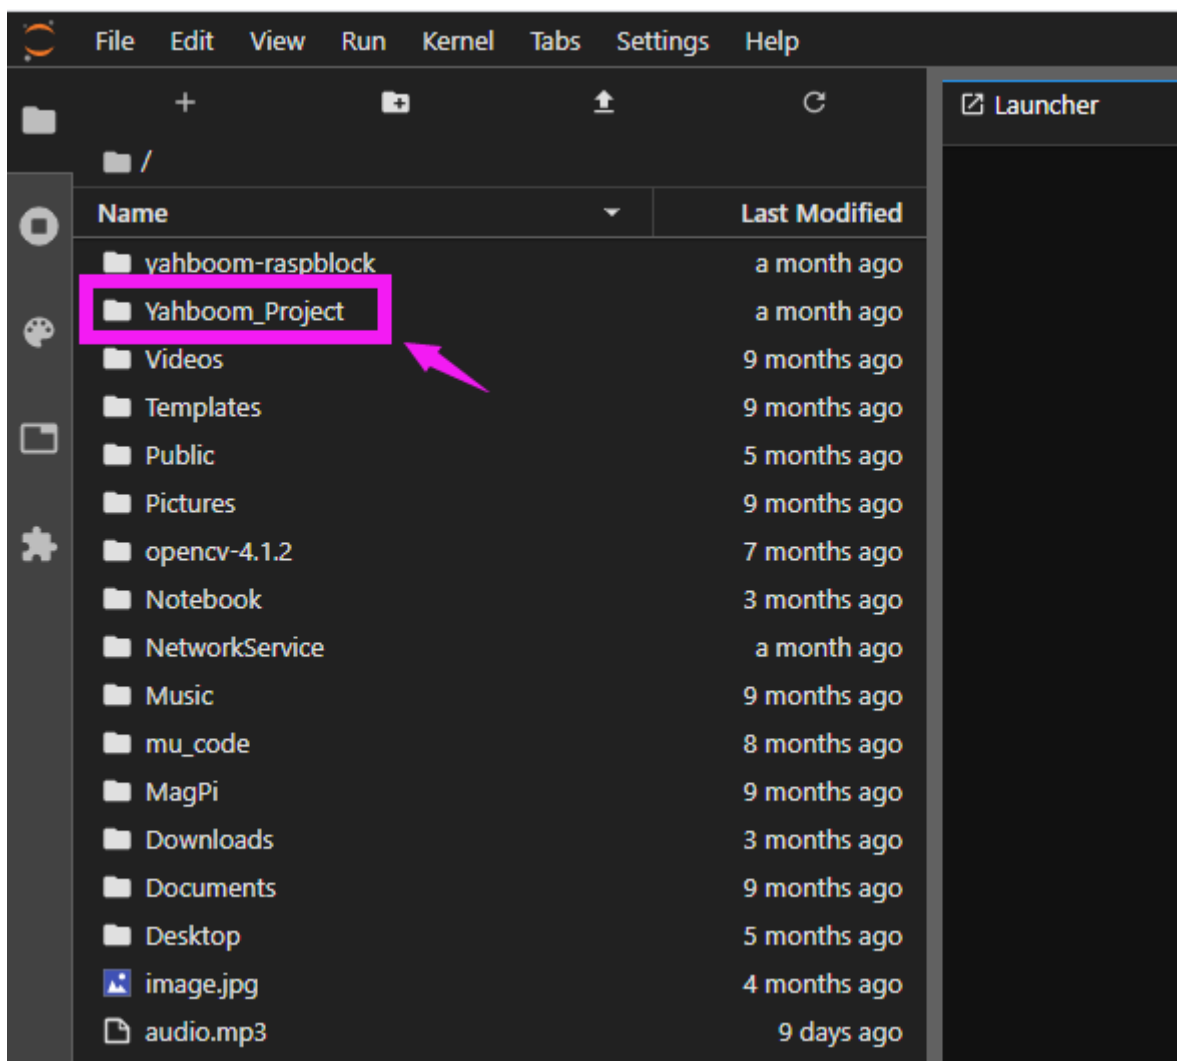

3. You will see following interface.

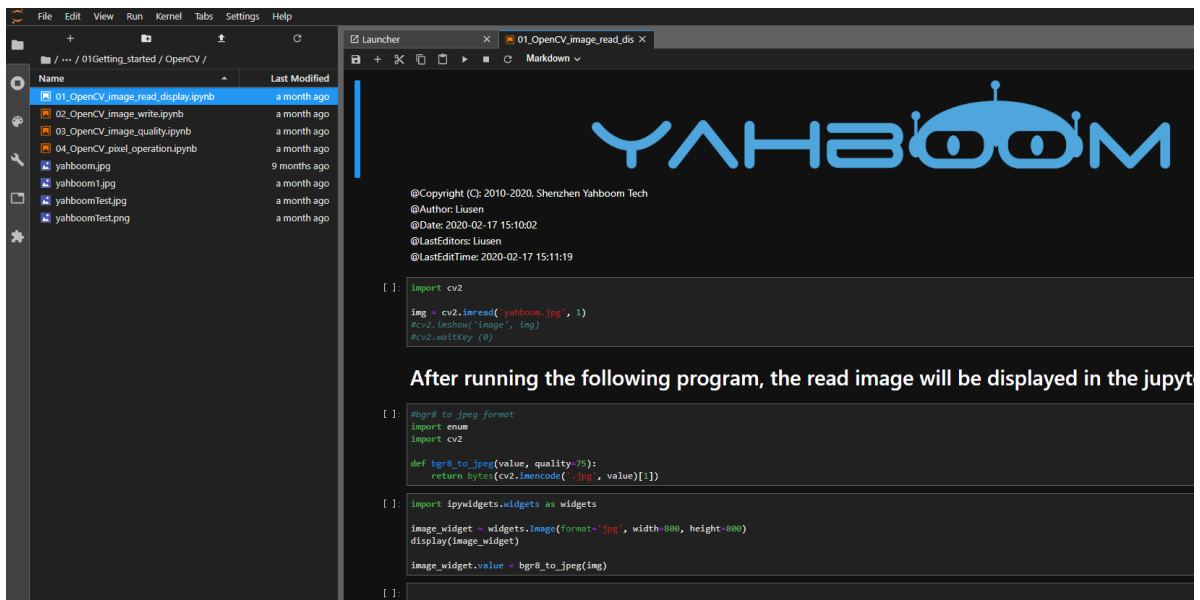

)

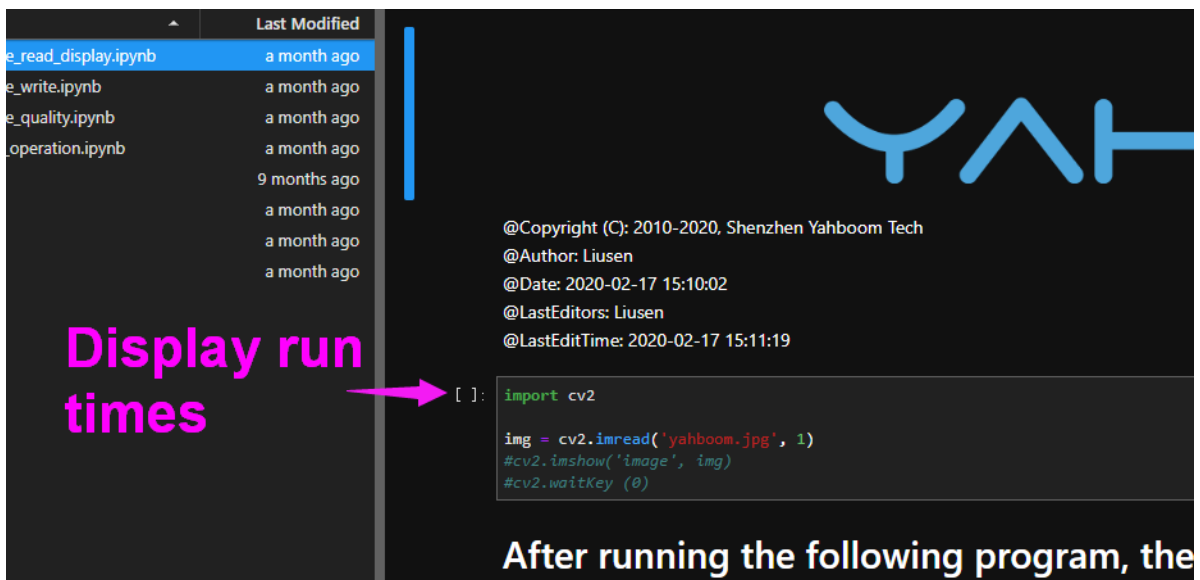

\4) You need to enter Yahboom_Project directory.

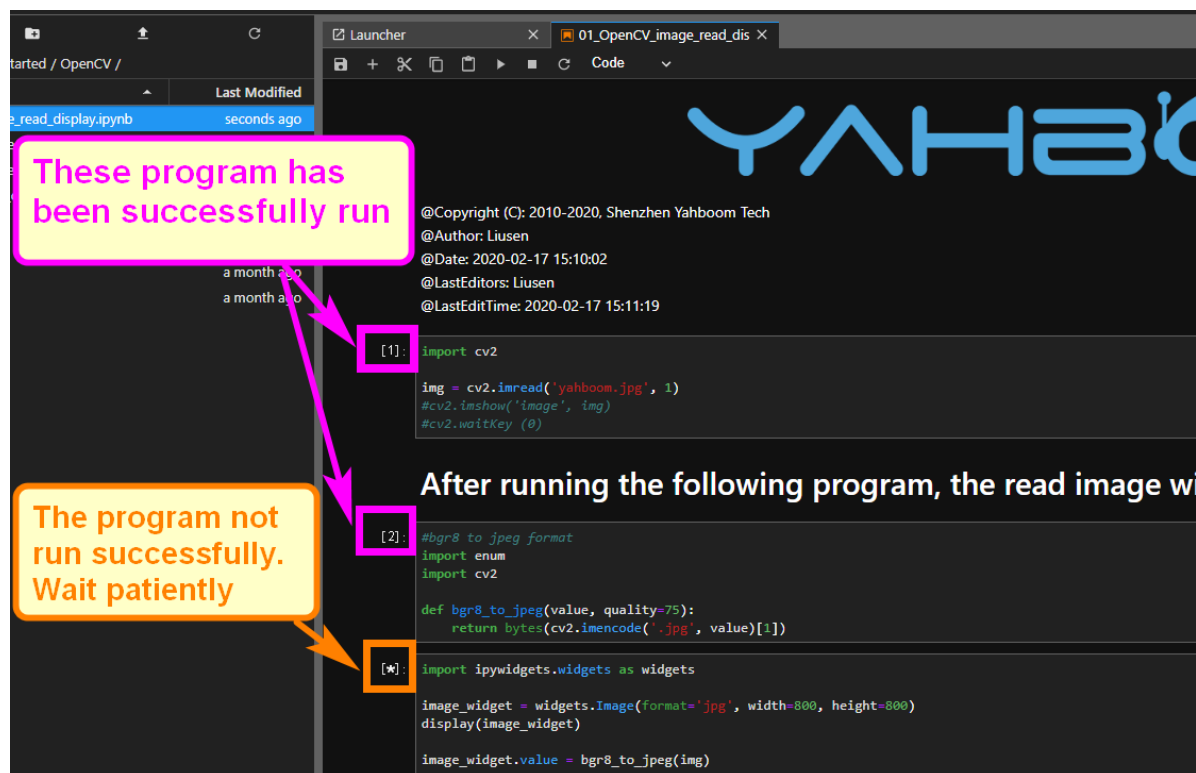

\5) You will see some directory, you can enter this directory. And you can see some code.

6. You can click the Run button in the top menu bar to run the program.

7. If you want to exit this program and run another program. You need to click following below. And open another program file.
